DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The Examiner has approved the information disclosure statement received on July 8, 2003 and the initialed copy (one copy) of the 1449 is attached with this correspondence.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the claimed "selection means for selecting a secondary synchronization code" in claim 6 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief

Art Unit: 2631

description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. Note that reference to the above drawing objection should be made in figures 3 and 4 where no selection means is shown.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 1-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It has been claimed in claims 1 and 7 that "cell search apparatus (claimed method for scrambling code in claim 7) which search cell bases on the received signal including ***data channel*** and synchronous channel, and the scrambling code identifying unit for correlating a plurality of scrambling codes belonging to the code group with the

Art Unit: 2631

data channel to obtain scrambling code unique to each cell." However, as the best interpretation to the claimed subject matter is found in fig. 2 elements 273 and 274, the disclosure does not show as those elements receiving the ***claimed data channel to identify the scrambling code unique to each cell.***

7. Claims 2-6 and 8-10 are inherently rejected as being dependent on the rejected base claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patent number 6,741,578, European Patent Application number EP 1-117-188 A2, IEEE Journal on Selected area in Communication and IEEE Transactions on Vehicular Transaction issued to Moon et al, Lee et al., Yi-Pin Eric Wang et al., Song et al. respectively disclose a cell search in wide band CDMA.
